

## How to Setup & Run this Project

### How to Run Project ( Video Tutorial ) - [Click Here](#)

#### Links

##### ❖ Install Latest NodeJs ( Ignore If Already Installed )

1. Visit the official Node.js website <https://nodejs.org/en/download/>
2. Download the Node.js installer
3. Run the installer.

— First Run Server then Client —

##### ❖ Steps to setup **Server** of the project

1. Open Project Folder In VS Code
2. Setup The Neon Database & obtain Database URL

Link : <https://get.neon.com>

now run the commands inside server folder to sync neon database and prisma schema

```
npx prisma db push
```

3. Setup **Brevo** ( For Email Feature )

Link : <https://www.brevo.com>

4. Setup **Inngest** Keys

Link : <https://www.inngest.com>

5. Setup **Clerk**

Link : <https://clerk.com>

## 6. Add **Clerk Webhooks** using **inngest**

Link : <https://dashboard.clerk.com>

- Enable “**Organizations**” feature in Clerk project.

## 7. Upload Project on **Github** and Deploy server on **Vercel**

## 8. Sync App on **Inngest** using “server live link”

Link : <https://www.inngest.com>

## 9. To run server locally open server folder in Integrated terminal

## 10. Install dependencies using command

```
npm install
```

## 11. Now run **server** using command

```
npm run server
```

## >>> Before Running **Client** Projects make sure **Server** is Running

### ❖ Steps To Run **Client** of The Project

1. Add **Clerk Publishable Key** in **client** folder **.env** file
2. Add **server live link** in **.env** file ( skip if running server locally )
3. Open **client** Folder in Integrated Terminal
4. Install Dependencies Using Command

```
npm install
```

## 5. Now Run Project Using Command

```
npm run dev
```

## 6. Deploy the client project on vercel
